SUMMARY

I'm an experienced game developer specializing in Unity and C#. I enjoy bringing games to life on mobile and PC, collaborating across disciplines, and helping teams do their best work through developer tools, AI-assisted workflows, and performance optimization.

EXPERIENCE

Fortis Games — Senior Game Engineer

Nov 2025 – Nov 2026

- Developed gameplay features for Twilight Towers within the Player Experience pod.
- Built AI-assisted workflows for code review, feature development, and documentation.
- Led performance investigations and refactors to reduce CPU overhead and draw calls.

Globant — Game Developer

Jul 2023 – Oct 2025

- Electronic Arts / The Sims 4: contributed to gameplay features and live updates.
- Epic Games / Rocket League: supported gameplay development focused on physics and 3D math.
- Zynga / Harry Potter: Puzzles and Spells: developed and optimized Unity gameplay and live events.

Tapps Games — Game Developer & Tooling Specialist

Feb 2022 – Jun 2023

- Developed Unity games including DinoQuest 2, Cult Summoner, and Pet Shop Fever.
- Created Unity tools that improved development efficiency across multiple teams.

CIn/Samsung — Software Engineer

Sep 2018 – Jan 2022

- Developed UWP applications including Samsung Gallery and Samsung Studio Plus.
- Led Unity developers on unpublished VR projects covering gameplay, physics, and graphics optimization.

SKILLS

Engines & languages: Unity (2D, 3D, VR), Unreal, Godot · C#, C++, Python

Tools: Git, Jenkins, Jira, Rider, Unity Cloud Services · AI-assisted development

EDUCATION

Universidade Federal de Pernambuco — BSc, Computer Science

2016 – 2021 · Game development focus; projects include Songverse and MySoundtrack.
